Planning, Real Estate and Economic Development Department 2023 Service Area Summary - Natural Systems

Economic Development and Long-Range Planning – Natural Systems is part of the Planning, Real Estate and Economic Development (PRED) Department, a department that champions the city-building priorities from planning and managing development opportunities and transportation infrastructure, to managing City real estate for population growth and economic prosperity.

Natural Systems develops policies and delivers programs to support Ottawa’s natural environment, urban forest and rural area. Centre of expertise for natural systems, providing guidance to promote sustainable development, fostering a healthy system of natural areas, greenspaces, and arable lands. Leverages partnerships, public outreach and stewardship to implement the city’s environmental goals.

Programs/Services Offered

- Oversee Urban Forest Management Plan
- Develop and implements policies to support and enhance the City’s natural areas
- Administer Environmental and Rural Clean Water Grant Programs
- Host events, including Wildlife Speaker Series
- Manage City-owned natural areas with community partners.
- Perform development and infrastructure review to ensure environmental considerations are reflected in growth
- Identify rural natural lands for acquisitions by City

Planning, Real Estate and Economic Development Department 2023 Service Area Summary – Resiliency and Climate Change

Economic Development and Long-Range Planning – Resiliency and Climate Change is part of the Planning, Real Estate and Economic Development (PRED) Department, a department that champions the city-building priorities from planning and managing development opportunities and transportation infrastructure, to managing City real estate for population growth and economic prosperity.

This unit is responsible for developing and coordinating strategic policies, programs and plans to reduce greenhouse gas emissions and build resiliency to climate change in Ottawa. As the City's centre of expertise for resiliency and climate change, the team also provides technical expertise on corporate projects and supports community initiatives.

Programs/Services Offered

Resiliency and Climate Change is responsible for the following city-wide initiatives:

- Climate Change Master Plan
- Energy Evolution: Ottawa's Community Energy Transition Strategy
- Climate Projections, Climate Vulnerability and Risk Assessment, and Climate Resiliency Strategy
- Annual Greenhouse Gas Emissions Inventories

2023 Service Area Summary - Solid Waste Services

Solid Waste Services is responsible for the development, management, and environmentally sound operation of the residential solid waste management system for the City.

This includes:

- Collecting, diverting, and disposing of residential waste, recycling and organics, parks waste, and household hazardous waste
- Overseeing the comprehensive management, operation, and maintenance of the City-owned Trail Waste Facility Landfill
- Managing contracts for waste collection across the City
- Providing graffiti removal services
- Planning for future waste programs and operations to ensure alignment with industry and economic growth and legislative requirements such as: the Solid Waste Master plan, service level reviews and technology and environmental assessments

Programs/Services Offered

- Curbside residential waste collection and disposal
- Multi-residential waste collection and disposal
- Parks waste collection and disposal
- Waste collection at City facilities
- Residential waste diversion programs (Green Bin Program, Blue/Black Box Program, Yellow Bag Program, Household Hazardous Waste depots etc.)
- Collections contract management

- Graffiti removal from City properties
- Landfill operations management
- Biosolid Land Application program

2023 Service Area Summary - Forestry Services

Forestry Services manages all aspects of the City's 10,000 hectares of urban and rural forests including 346,000 street and park trees in order to preserve, protect, maintain and enhance forest cover in the Nation's Capital.

Programs/Services Offered

- Tree and forest maintenance, which includes pruning, removal, and stumping activities
- Tree protection and tree by-law enforcement including Tree Removal Permits
- Tree nursery operations, which includes tree planting, watering and establishment pruning activities
- Trees in Trust program
- Streetscape, park, and facility tree planting
- Community planting projects
- Commemorative Tree program
- Green Acres - Ottawa's rural reforestation program
- Schoolyard Tree Planting Grant program
- Invasive pest management (ex. Spongy Moth, Emerald Ash Borer and Dutch Elm Disease)

<p>The Bear Brook Watershed Study is required to the effects of urban growth in Ottawa's east end on flooding, erosion, public health and safety, and environmental protection in the Bear Brook Watershed. It will encompass continuing growth in the East Urban Community, the Orleans South urban growth area, and the proposed Tewin community. The main focus of the Watershed Study will be an environmental assessment to identify a preferred solution for dealing the cumulative hydrology impacts of the increasing urban development. The Watershed Study will recommend measures to reduce risks from flooding and build resiliency to other future climate conditions.</p>			Tax Supported/ Dedicated	138	Tax Supported/ Dedicated Debt	0

<p>Official Plan policies 11.6(5) and 11.6(6) authorize the City to secure and conserve important green spaces through a variety of means, including but not limited to management agreements, partnerships, and acquisitions. In some cases, the City may be obliged to purchase land at the request of the owner. The City normally receives several such requests each year. Funding for environmental land conservation and acquisition fulfills both a corporate long-term strategic goal and Official Plan policy. Acquisitions of green space land is critical to building resiliency to changing temperatures and precipitation.</p>			Tax Supported/ Dedicated	25	Tax Supported/ Dedicated Debt		700

<p>The Climate Change Master Plan is the overarching framework for how the City of Ottawa will reduce emissions (climate mitigation) and build climate resiliency to current and future climate conditions (climate adaptation) in Ottawa. It includes eight priorities including Energy Evolution: Ottawa's Community Energy Transition Strategy and the Climate Resiliency Strategy. Energy Evolution is the framework for how Ottawa can achieve its greenhouse gas emission reduction targets and it identified 20 priority projects to accelerate action and investment. The Climate Resiliency Strategy will build on the Climate Projections for the National Capital Region report and the Climate Vulnerability and Risk Assessment and will identify actions to mitigate the greatest risks. Funding for this initiative will be used to implement the Climate Change Master Plan.</p>			Tax Supported/ Dedicated	5,000	Tax Supported/ Dedicated Debt		0

<p>The Energy Management Investment Strategy is intended to manage the City's increasing growth in demand for energy through the implementation of various energy conservation measures in City facilities. The Energy Management Investment Strategy will reduce the City's environmental footprint, ensure the City's compliance under the mandate of the 2009 Green Energy Act and continue the City's leadership role in respect to energy conservation and demand management. \$3M will be invested into various facility enhancements designed to reduce overall building energy intensity, energy costs and Greenhouse Gas (GHG) emissions. The measures are expected to have an average payback of 8 years.</p> <p>Projects are selected under this budget to directly reduce electricity or natural gas consumption. The main GHG mitigation projects include optimizing building automation equipment and integrating to the activenet booking tool to reduce run-times, installation of air source heat pumps as heating alternatives, and hybrid boiler systems designed to reduce Natural Gas (NG) consumption by running on electricity.</p>			Tax Supported/ Dedicated	3,000	Tax Supported/ Dedicated Debt		0

Project(s) within a Program Information			\$000's
907799	Landfill Disposal Stage 5 Development	Class of Estimate: Not Applicable	27,500
Category: Regulatory	Ward: 21	Year of Completion: 2024	
<p>Stage 5 of the Trail Waste Facility is a new cell approved by the Ministry of the Environment, Conservation and Parks (MECP) in the 2005 Trail Waste Facility Optimization Environmental Assessment (EA). A leachate liner must be installed over one half of Stage 5 (5a) by 2025 to support ongoing waste management requirements at Trail. To develop this stage a leachate liner must be designed, the site excavated and liner installed. The engineering aspects of this work commenced in 2020 to approve any variance from the proposed EA design.</p> <p>Year of completion: 2028.</p>			
910961	Buffer land Development	Class of Estimate: Not Applicable	3,000
Category: Regulatory	Ward: 21	Year of Completion: 2025	
<p>As a result of residential growth and increased diversion efforts of leaf and yard waste, there is an ongoing requirement to expand the existing processing facility, implement seasonal temporary collection transfer stations across the city and for processing an increasing quantity of the incoming materials. Each spring and fall, a peak period is determined in which leaf and yard waste is collected as a single stream material as part of the city's existing waste collection contract. Transfer station(s) are established strategically in the city before these materials are then hauled to the Barnsdale Road processing facility. Costs for labour, equipment, contracted services and facility rental/maintenance is required to establish transfer station(s) and move material to Barnsdale Road. With increasing leaf and yard waste quantities incoming, expansion of the processing pad is required. This expansion includes the excavation of native materials, purchase of new base and surface materials as well as the equipment and labour to construct. Materials on site must be managed regularly and costs related to additional equipment, labour and technological devices, and professional services as required. Expansion of the leaf and yard waste facility to accommodate the recent increases in volumes may also somewhat buffer the City when receiving larger volumes of these materials following extreme weather events. In addition to the Barnsdale, expansion and development of bufferlands properties is also required to support continuous operational requirements, given the development of the final waste footprint and the limited operational surface space required to support ongoing activities, such as soil management, etc.</p>

Project(s) within a Program Information			\$000's
910962 Trail Road Landfill Expansion & Development		Class of Estimate: Not Applicable	
Category: Regulatory	Ward: 21	Year of Completion: 2025	
<p>The Trail Road Landfill operates on a continuous basis for disposal of solid waste material. As such annual reinvestment is required to identify and address operational and safety improvements of the site. For example, modifications to signage, fencing replacement, material stock pile volume measurements and associated design and operations reports.</p>			
910963 Trail Road Gas Collection System Expansion		Class of Estimate: Not Applicable	
Category: Regulatory	Ward: 21	Year of Completion: 2025	
<p>The Trail Road Solid Waste Landfill requires annual maintenance, repair and upgrade to meet regulatory requirements as specified in the Provincial Certificate of Approval. This program consists of landfill capping of various stages, gas collection systems, groundwater containment solutions, cell expansion and other landfill management projects to keep the landfill operating efficiently, effectively and in compliance. In accordance with the requirements of the Environmental Protection Act, the City of Ottawa is required to prevent the migration of landfill gas into the environment. The landfill gas collection system was expanded to Stage 3 and 4 as well as around the perimeter of the site over the past several years to compliment landfilling activities and mitigate off-site migration. The City continues to operate under an abatement plan with the Ministry of Environment, Conservation, and Parks (MECP) as a result of exceedence of landfill gas trigger concentrations along the perimeter of the site. Functions associated with the activity include replacement of the temporary perimeter flare, repairs and expansion of the existing gas collection system and installation of a permanent gas collection system on completed portions of Stage 2 and 3 of the Trail Road Solid Waste Landfill. Furthermore, a supplementary enhanced gas collection system will need to be designed and installed in conjunction with the leachate recirculation system.</p>
