

Document 3. Automated Speed Enforcement Existing and Planned Locations

Table 1. NEW 2024 LOCATIONS:

Listed in Table 1. below are new locations where automated speed enforcement (ASE) is proposed for 2024 implementation. All twelve (12) sites have been reviewed and found to meet vendor technical and design specifications, available hydro (preliminary review only*), sufficient space for the device and required signage. There may be a possibility that unforeseen underground constraints limit the installation of ASE at any of these sites. Constraints will be confirmed through the circulation process.

*Due to labour disruptions at Ottawa Hydro and the subsequent backlog of requests, to assist the City of Ottawa in selecting ASE sites, only a preliminary review of power source connections has been conducted by Ottawa Hydro at this time. Coordination and required detailed review is currently underway.
