

Document 2 – Traffic Data by Type in Bar Graph Format

Traffic Services has been collecting traffic data on the segment of Wellington Street between Metcalfe and O'Connor Streets since Wellington Street was re-opened in April 2023. Data collection for light vehicle and motorcycle volumes, heavy vehicle volumes and bicycle volumes occurred in July, September, and December. This data is being compared to corresponding available data for July 2018, a period prior to the COVID-19 Pandemic.

Table 1 in the staff report summarizes the available data by vehicle type collected in July 2018, and in July, September, and December 2023. This same volume data is being presented below in bar graph format by vehicle type to provide a visual representation of the data.

Figure 1 - Light Vehicle and Motorcycle Traffic Volumes

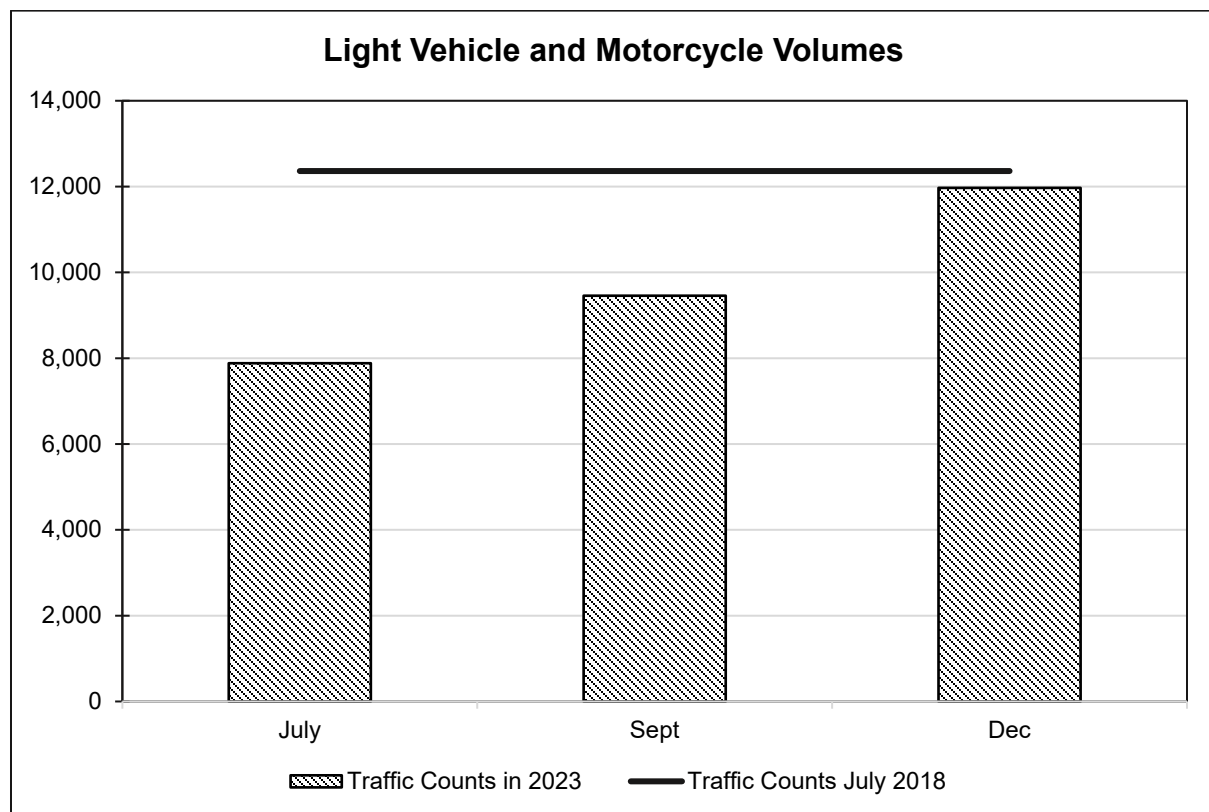

Figure 2 - Heavy Vehicle Traffic Volumes
