

Tree Information Report

Submitted as part of Committee of Adjustment Application to the City of Ottawa

Date of Report: November 29, 2023
Property Address: 2023 Merivale Road
Prepared for: Franca Reitano; franca.reitano@gmail.com
Prepared by: Kevin Myers, ISA Certified Arborist; kevin.myers@dendronforestry.ca
Date of Site Visit: November 27, 2023

This Report must be read in its entirety, including the Assumptions and Limiting Conditions attached herein.

Purpose of the Report

The purpose of this report is to provide the client with a detailed description of all protected trees on site as per the City of Ottawa's Tree Protection By-law No. 2020-340. This report is part of a Committee of Adjustment application to the City of Ottawa for severance of the property. No development is proposed at this time, and therefore no determinations on tree retention can be made. The information provided at the time of report preparation includes:

- 5R Plan by Kenneth G. Murray, dated May 18, 1990

This report does not consider additional factors that could influence tree retainability such as:

- development
- site grading, and requirement for retaining walls and/or swales
- installation of services for the new units
- capping of existing water and sewer services
- installation of gas lines for the new units
- site access

The potential for retaining those tree(s) identified for retention in this report may change as more information on the site-specific construction details is provided during the building permitting phase. For those trees that are recommended for retention, mitigation measures are provided to reduce the impact during construction. It should be noted that the construction phase includes all site works that could impact trees, from the capping of services at the beginning to the final landscaping steps at the end.

While a rationale for removing trees may be provided based on document review, **this report does not grant permission to remove trees: a permit from the city must be received before removal of distinctive trees can occur.**

Methodology

The following materials were reviewed as part of this report:

- 5R Plan
- GeoOttawa tree inventory layer and aerial photography
- Google© Street View imagery – various years

A site visit was conducted to collect the following information from each tree classified as protected under the City of Ottawa’s Tree Protection By-law No. 2020-340:

- Diameter at breast height (1.3 m from grade)
- Species
- Tree health
- Pertinent measurements to structures such as fences, driveways, or building

Existing site information

The site is currently occupied by a single-story dwelling with a large open lawn to the south of this building. There are remnants of cedar hedges on the city ROW to the north of the house (~10 stems, 8-18cm DBH, 15 feet tall) and to the south of the lawn along the property boundary (~45 stems, 5-20cm DBH, 10-15 feet tall).

Appendix A is an inventory of all trees that are protected under City of Ottawa Tree Protection (By-law No. 2020-340) on the site and adjacent City property. This includes Distinctive Trees (private trees with a diameter at breast height (dbh) of 30 cm or greater) and city-owned trees of all sizes. It also includes Distinctive Trees on adjacent properties whose Critical Root Zone (CRZ) extend into the subject area. The CRZ is an area around the trunk with a radius equivalent to 10 times the diameter of the trunk. This does not take into account infrastructure such as buildings and asphalt and assumes the tree has no restrictions on root growth.

Proposed development and Tree protection

As no development is proposed at this time, it is recommended that all trees be retained. A further report will be required to determine whether the trees can be retained based on future development plans.

The undersigned personally inspected the property and issues associated with this report on November 27, 2023. On Behalf of Dendron Forestry Services,

Kevin Myers, MFC, RPF in Training
ISA Certified Arborist, ON-2907A
Kevin.myers@dendronforestry.ca; (514) 726-8531

APPENDIX A

TREE INFORMATION TABLE

Tree ^{1,4}	Species	DBH (cm)	Ownership ²	Tree condition ³	Forester recommendation
1	White pine (<i>Pinus strobus</i>)	41	City	Fair/Poor: lost top; mechanical wound on trunk; weak foliage – chlorosis and some dieback	Retain until such time as development is proposed. Determinations to be made at that time.
2	White pine (<i>Pinus strobus</i>)	32	City	Good/Fair: some dieback	Retain until such time as development is proposed. Determinations to be made at that time.
3	White pine (<i>Pinus strobus</i>)	38	City	Poor: lost top – debarking from top; woodpecker activity; slight lean to road	Retain until such time as development is proposed. Determinations to be made at that time.
4	Red oak (<i>Quercus rubra</i>)	100 (estimate)	Adjacent – 22 Brookdale	Good/Fair: several canopy branches pruned – epicormic shoots from wounded ends; black bark from 1 st union – decay possible	Retain until such time as development is proposed. Determinations to be made at that time.
5	Scot's pine (<i>Pinus sylvestris</i>)	38	Subject property	Fair/Poor: thin crown; dead branches in canopy	Retain until such time as development is proposed. Determinations to be made at that time.
6	Scot's pine (<i>Pinus sylvestris</i>)	34	Subject property	Dead	Retain until such time as development is proposed. Determinations to be made at that time.
7	Scot's pine (<i>Pinus sylvestris</i>)	32	Subject property	Poor: very thin crown; no root flare visible; small mechanical wound at base	Retain until such time as development is proposed. Determinations to be made at that time.

¹ Please refer to the attached Tree Information map for tree numbers. Note that this includes a tree layer added to a screenshot of a scan of the 5R plan. This layer includes only information about the trees and the original plan is not altered in this process.

²Ownership of the tree in this report is based on the observations in the field and comparison to aerial imagery from GeoOttawa and should not be used as a determination of ownership. For ownership disputes, a survey should be relied on. For boundary trees, consent from the adjacent property owner is required for removal as part of the application.

³Trees on adjacent properties do not include a full assessment. The diameters are estimated, and the health is estimated based on what is visible from the subject property. Trees along the property line may also have limited health assessments if part of the tree is not visible.

⁴The location of these trees was not provided and has been estimated

APPENDIX B

PHOTOGRAPHS

Right: Trees 1 (right) and 2 (left) - city pines to be retained.

Below left: Tree 4 - adjacent oak to be retained.

(emergent pines left to right) Trees 5-7 - Private pines to be retained.

APPENDIX C

ASSUMPTIONS AND LIMITING CONDITIONS

Intended Use of the Report

This Report was prepared by Dendron Forestry Services (hereafter “Dendron”) at the request of the Client. The results, observations, interpretations, analysis, recommendations, and conclusions contained within this Report are to be used solely for the purposes outlined within this Report. All other uses are impermissible and unintended, unless specifically stated in writing in the Report.

Intended User of the Report

This Report was prepared by Dendron for the exclusive use of the Client and may not be used or relied upon by any other party. All other users are unintended and unauthorized, unless specifically stated in writing in the Report.

Limitations of this Report

This Report is based on the circumstances and on-site conditions as they existed at the time of the site inspection and the information provided by the Client and/or third parties to Dendron. On-site conditions may limit the extent of the on-site inspection(s) conducted by Dendron, including weather events such as rain, flooding, storms, winds, tornados, snowfall, snow cover, hail; obstructions including fencing, dwellings, buildings, sheds, plants, and animals; lack of access to the entire perimeter of the tree due to adjacent properties; the shape of the tree; and accessibility of the tree crown, branches, trunk, or roots for examination.

In the event that information provided by the Client or any third parties, including but not limited to documents, records, site and grading plans, permits, or representations or any site conditions are updated or change following the completion of this Report, this Report is no longer current and valid and cannot be relied upon for the purpose for which it was prepared. Dendron and its agents, assessors, and/or employees are not liable for any damages, injuries, or losses arising from amendments, revisions, or changes to the documents, records, site and grading plans, permits, representations, or other information upon which Dendron relied in preparing this Report.

No assessment of any other trees or plants has been undertaken by Dendron. Dendron and its agents, assessors, and/or employees are not liable for any other trees or plants on or around the subject Property except those expressly identified herein. The results, observations, interpretations, analysis, recommendations, and conclusions contained within this Report apply only to the trees identified herein.

Trees and plants are living organisms and subject to change, damage, and disease, and the results, observations, interpretations, analysis, recommendations, and conclusions as set out in this Report are valid only as at the date any inspections, observations, tests, and analysis took place. No guarantee, warranty, representation, or opinion is offered or made by Dendron as to the length of the validity of the results, observations, interpretations, analysis, recommendations, and conclusions contained within this Report. As a result the Client shall only rely upon this Report as representing the results, observations, interpretations, analysis, recommendations, and conclusions that were made as at the date of such inspections, observations, tests, and analysis. The trees discussed in this Report should be re-assessed periodically and at least within one year of the date of this Report.

No Opinion regarding ownership of the Tree

This Report was not prepared to make a determination as to ownership of the subject tree(s). Where ownership of the subject tree(s) is identified within this Report, said identification is based on the information provided by the Client and third parties, including surveys, permits, and site and grading plans and may not be relied upon as a guarantee, warranty, or representation of ownership.

Assumptions

This Report is based on the circumstances and conditions as they existed at the time of the site inspection and the information provided by the Client and/or third parties to Dendron. Where documents, records, site and grading plans, permits, representations, and any other information was provided to Dendron for the purpose of preparing this Report, Dendron assumed that said information was correct and up-to-date and prepared this Report in reliance on that information. Dendron and its agents, assessors, and/or employees, are not responsible for the veracity or accuracy of such information. Dendron and its agents, assessors, or employees are not liable for any damages, injuries, or losses arising from inaccuracies, errors, and/or omissions in the documents, records, site and grading plans, permits, representations, or other information upon which Dendron relied in preparing this Report.

For the purpose of preparing this Report, Dendron and its agents, assessors, and/or employees assumed that the property which is the subject of this Report is in full compliance with all applicable federal, provincial, municipal, and local statutes, regulations, by-laws, guidelines, and other related laws. Dendron and its agents, assessors, and/or employees are not liable for any issues with respect to non-compliance with any of the above-referenced statutes, regulations, bylaws, guidelines, and laws as it may pertain to or affect the property to which this Report applies.

For the purpose of preparing this Report, Dendron and its agents, assessors, and/or employee assumed that there are no hidden or unapparent conditions affecting the results, observations, interpretations, analysis, recommendations, and conclusions contained within this Report.

No Publication

The Client acknowledges and agrees that all intellectual property rights and title, including without limitation, all copyright in this Report shall remain solely with Dendron Forestry. Possession of this Report, or a copy thereof, does not entitle the Client or any third party to the right of publication or reproduction of the Report for any purpose save and except where Dendron has given its prior written consent.

Neither all nor any part of the contents of this Report shall be disseminated to the public through advertising, public relations, news, sales, the internet or other media (including, without limitation, television, radio, print or electronic media) without the prior written consent of Dendron Forestry.

Implementing the Report Recommendations

Dendron and its agents, assessors, and/or employees accept no responsibility for the implementation of any part of this Report unless specifically requested to provide oversight on the implementation of the recommendations. In the event that inspection or supervision of all or part of the implementation of the within recommendations is requested, that request shall be in writing and the details agreed to in writing by both parties.

Dendron and its agents, assessors, and/or employees are not liable for any damages or injuries arising from the manner in which the recommendations in this Report are implemented, including failure to, incorrect, or negligent implementation of the recommendations.

Further Services

Neither Dendron nor any assessor employed or retained by Dendron for the purpose of preparing or assisting in the preparation of this Report shall be required to provide any further consultation or services to the Client, save and except as already carried out in the preparation of this Report and including, without limitation, to act as an expert witness or witness in any court in any jurisdiction unless the Client has first made specific arrangements with respect to such further services, including, without limitation, providing the payment of the Report's regular hourly billing fees.

Limits of Liability

In carrying out this Report, Dendron and its agents, assessors, and/or employees have exercised a reasonable standard of care, skill, and diligence as would be customarily and normally provided in carrying out this Report. While reasonable efforts have been made to ensure that the trees recommended for retention are healthy, no guarantees are offered, or implied, that these trees, or all parts of them will remain standing. It is professionally impossible to predict with absolute certainty the behaviour of any single tree or group of trees, or all their component parts, in all given circumstances. Inevitably, a standing tree will always pose some risk. Most trees have the potential to fall, lean, or otherwise pose a danger to property and persons in the event of adverse weather conditions, and this risk can only be eliminated if the tree is removed.

Without limiting the foregoing, no liability is assumed by Dendron for:

- a) any legal description provided with respect to the Property;
- b) issues of title and or ownership respect to the Property;
- c) the accuracy of the Property line locations or boundaries with respect to the Property; and
- d) the accuracy of any other information provided to Dendron by the Client or third parties;
- e) any consequential loss, injury or damages suffered by the Client or any third parties, including but not limited to replacement costs, loss of use, earnings and business interruption; and
- f) the unauthorized distribution of the Report.

The total monetary amount of all claims or causes of action the Client may have as against Dendron Forestry, including but not limited to claims for negligence, negligent misrepresentation, and breach of contract, shall be strictly limited solely to the total amount of fees paid by the Client to Dendron Forestry pursuant to the Contract for Services dated October 23, 2023 for which this Assessment was carried out.

Further, under no circumstance may any claims be initiated or commenced by the Client against Dendron or any of its directors, officers, employees, contractors, agents, assessors, or Assessors, in contract or in tort, more than 12 months after the date of this Report.

No Third Party Liability

This Report was prepared by Dendron exclusively for the Client for the purpose set out in the Report. Any use which a third party makes of this Report, or any reliance on or decisions a third party may make based upon this Report, are made at the sole risk of any such third parties. Dendron Forestry accepts no responsibility for any damages or loss suffered by any third party or by the Client as a result of decisions made or actions based upon the unauthorized use or reliance of this Report by any such party.

General

Any plans and/or illustrations in this Report are included only to help the Client visualize the issues in this Report and shall not be relied upon for any other purpose. This report is best viewed in colour. Any copies printed in black and white may make some details difficult to properly understand. Dendron accepts no liability for misunderstandings due to a black and white copy of the report.

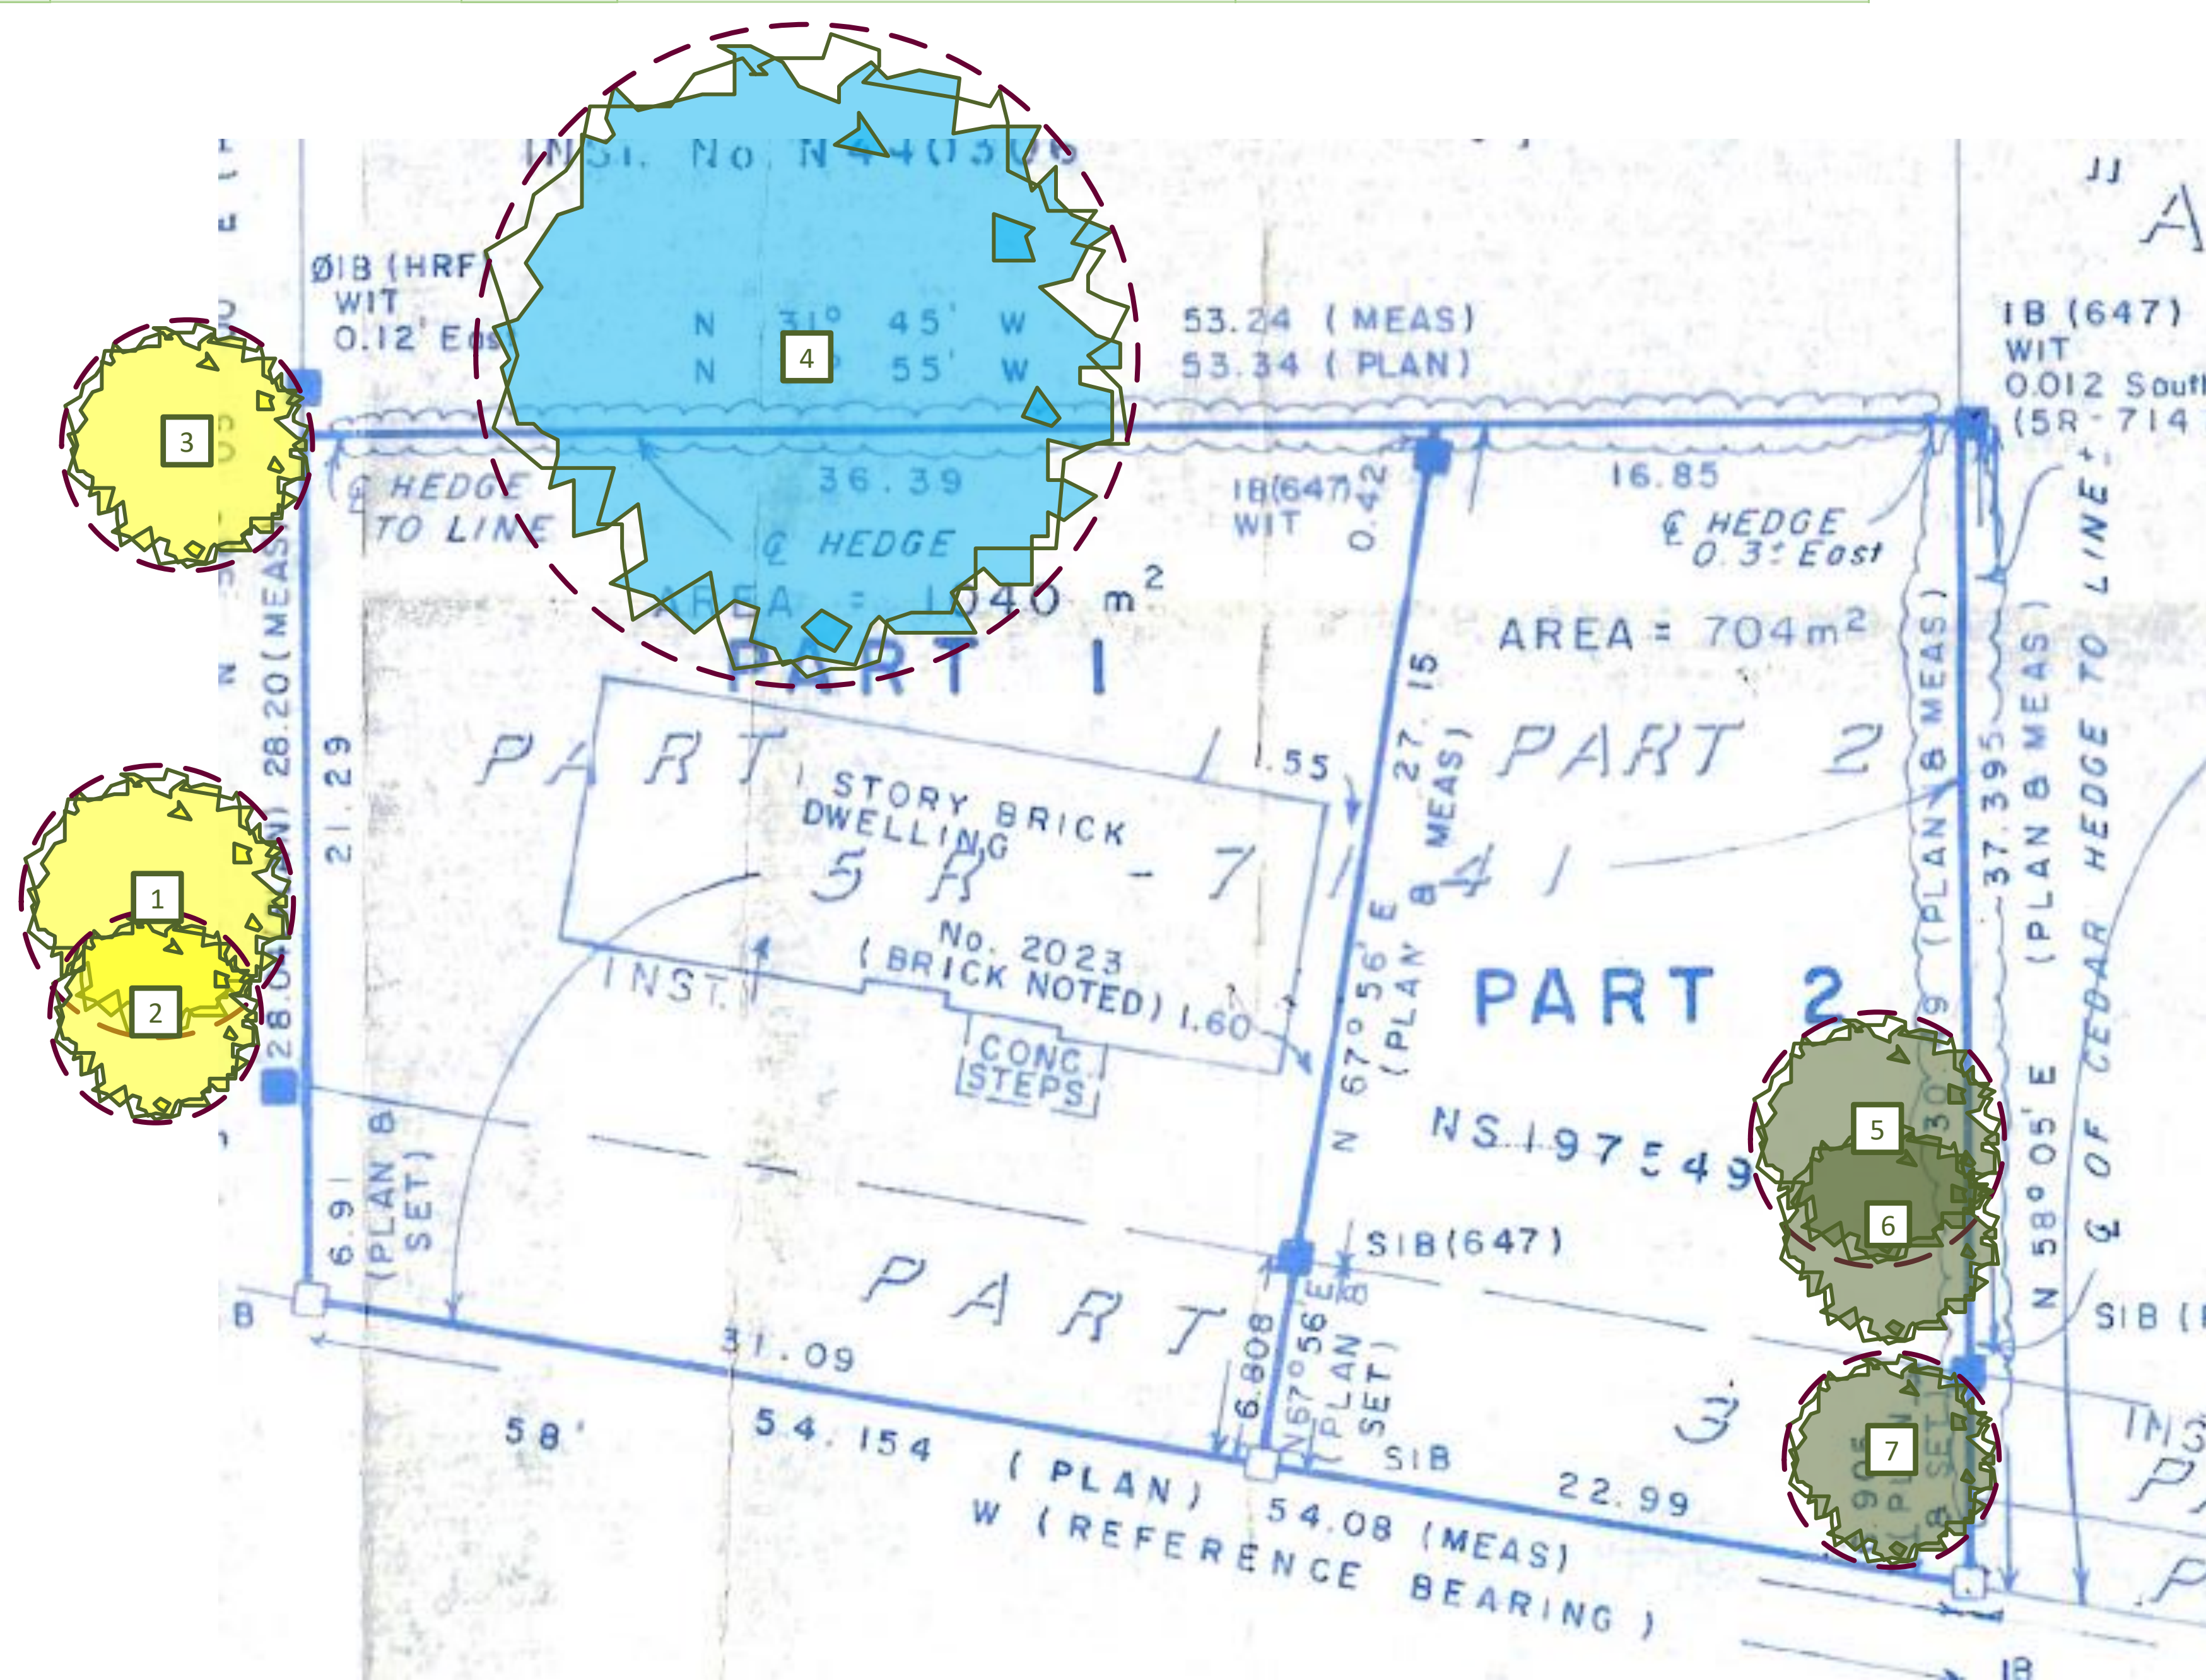

Notwithstanding any of the above, nothing in this Report is taken to absolve the Client of the responsibility of obtaining a new Report in the event that the circumstances of the tree change.

Tree ^{1,4}	Species	DBH (cm)	Tree condition ³	Forester recommendation
1	White pine (<i>Pinus strobus</i>)	41	Fair/Poor: lost top; mechanical wound on trunk; weak foliage – chlorosis and some dieback	Retain until such time as development is proposed. Determinations to be made at that time.
2	White pine (<i>Pinus strobus</i>)	32	Good/Fair: some dieback	Retain until such time as development is proposed. Determinations to be made at that time.
3	White pine (<i>Pinus strobus</i>)	38	Poor: lost top – debarking from top; woodpecker activity; slight lean to road	Retain until such time as development is proposed. Determinations to be made at that time.
4	Red oak (<i>Quercus rubra</i>)	100 (estimate)	Good/Fair: several canopy branches pruned – epicormic shoots from wounded ends; black bark from 1 st union – decay possible	Retain until such time as development is proposed. Determinations to be made at that time.
5	Scot's pine (<i>Pinus sylvestris</i>)	38	Fair/Poor: thin crown; dead branches in canopy	Retain until such time as development is proposed. Determinations to be made at that time.
6	Scot's pine (<i>Pinus sylvestris</i>)	34	Dead	Retain until such time as development is proposed. Determinations to be made at that time.
7	Scot's pine (<i>Pinus sylvestris</i>)	32	Poor: very thin crown; no root flare visible; small mechanical wound at base	Retain until such time as development is proposed. Determinations to be made at that time.

Note: the tree layer has been added to the original 5R plan supplied by the client in pdf format. This layer refers to the trees only, and the original plan has not been altered in the process. Refer to the original plan for details as quality is lost when importing the plan into the mapping software used to create the tree layer.

Legend

- Critical Root Zone
- Private Tree
- Tree either fully or partly on adjacent property
- Tree either fully or partly on city property
