CONSENT APPLICATION

COMMENTS TO THE COMMITTEE OF ADJUSTMENT
PANEL 3

PLANNING, REAL ESTATE AND ECONOMIC DEVELOPMENT DEPARTMENT

Site Address: 6784 Fernbank Road
Legal Description: Part of lot 18, Concession 9, Geographic Township of
Gouldbourn
File No.: D08-01-23/B-00272
Report Date: November 10, 2023
Hearing Date: November 14, 2023
Planner: Luke Teeft
Official Plan Designation: Rural Transect, Rural Countryside, Greenspace, Natural
Heritage System Core Area
Zoning: RU, EP3

DEPARTMENT COMMENTS

The Planning, Real Estate and Economic Development Department **requests an adjournment of** the application.

DISCUSSION AND RATIONALE

Section 53 (12) of the *Planning Act*, R.S.O. 1990, c .P.13, as amended, permits the criteria for the subdivision of land listed in Section 51 (24) to be considered when determining whether provisional consent may be granted by a committee of adjustment. With respect to the criteria listed in Section 51 (24), staff have concerns with the proposed consent. The proposed new lot is located within a Natural Heritage System Core Area and staff are not satisfied with the EIS submitted in support.

The subject property is zoned RU and EP3 and designated Rural Countryside and Greenspace under the Official Plan. The proposed new lot and development envelope on the retained lot are both outside of the area designated Greenspace, although the entire property falls within a Natural Heritage System Core Area. The proposed development envelope is within an area of mature woodland which is not seen as the location that would cause the least amount of disturbance to the natural features on the site. Staff are requesting that the applicant submit a new EIS with a development envelope outside of the treed area. Staff are also requesting that the EIS demonstrate how the proposed development meets the requirement of “maintaining or enhancing” the natural features and ecosystem functions on the rather than just no negative impacts. As

a result, staff are requesting that the application be adjourned to provide the applicant time to submit a revised EIS to the satisfaction of Planning Services.

Mapping has indicated that there is inferred karst topography on the property. As a result, a notice on title identifying the potential for karst will be required.

CONDITIONS

If approved, the Planning, Real Estate and Economic Development Department requests that the Committee of Adjustment impose the following conditions on the application:

1. That the Owner(s) provide evidence that payment has been made to the City of Ottawa for cash-in-lieu of the conveyance of land for park or other public recreational purposes, plus applicable appraisal costs. The value of land otherwise required to be conveyed shall be determined by the City of Ottawa in accordance with the provisions of By-Law No. 2022-280, as amended. Information regarding the appraisal process can be obtained by contacting the Planner.
2. That the Owner(s) prepares and submits an Environmental Impact Statement (EIS) to satisfaction of the **General Manager of the Planning, Infrastructure and Economic Development Department, or his/her designate**. If the accepted report recommends specific mitigation measures or other requirements, the Owner shall enter into a Development Agreement with the City, at the expense of the Owner(s) and to the satisfaction of the **General Manager of the Planning, Infrastructure and Economic Development Department, or his/her designate**, which is to be registered on the title of the property, which includes those recommendations.
3. That the Owner enter into an Agreement with the City, at the expense of the Owner(s) and to the satisfaction of Development Review Manager of the Relevant Branch within Planning, Real Estate and Economic Development Department, or his/her designate, which provides the following covenant/notice that runs with the land and binds future Owner(s) on subsequent transfers:

“The City of Ottawa does not guarantee the quality or quantity of the groundwater. If, at some future date, the quality or the quantity of the groundwater becomes deficient, the City of Ottawa bears no responsibility, financial or otherwise, to provide solutions to the deficiency, such solutions being the sole responsibility of the homeowner.”

The Committee requires a copy of the Agreement and written confirmation from City Legal Services that it has been registered on title.

4. That the Owner enter into an Agreement with the City, at the expense of the Owner(s) and to the satisfaction of **Development Review Manager of the Relevant Branch within Planning, Real Estate and Economic Development Department, or his/her designate**, which provides the following covenant/notice that runs with the land and binds future Owner(s) on subsequent transfers:

“The City of Ottawa has identified that there are potential karst topography, thin soils, and organic soils within the area that may require site specific detailed geotechnical engineering solutions to allow for development, the City of Ottawa bears no responsibility, financial or otherwise, to provide solutions to the deficiency, such solutions being the sole responsibility of the homeowner.”

The Committee requires a copy of the Agreement and written confirmation from City Legal Services that it has been registered on title.

5. That the Owner(s) provide proof to the satisfaction of **Development Review Manager of the Relevant Branch within Planning, Real Estate and Economic Development Department, or his/her designate**, to be confirmed in writing from the Department to the Committee, that the proposed severed parcel has its own independent private sewage system, storm/foundation drainage, and well and that they do not cross the proposed severance line. If the systems cross the proposed severance line, are not independent, or do not meet the minimum spacing requirements of the Ontario Building Code and City of Ottawa Hydrogeological and Terrain Analysis Guidelines, the Owner(s) will be required to relocate the existing systems or construct new systems, at his/her own cost.
6. That the Owner acknowledges and agrees to convey to the City, at no cost to the City, an unencumbered road widening across the complete frontage of the lands, measuring 13 meters from the existing centerline of pavement/the abutting right-of-way along Fernbank Road, pursuant to Section 50.1(25)(c) of the Planning Act and Schedule C16 of the City’s new Official Plan, if required. The exact widening must be determined by legal survey. The Owner shall provide a reference plan for registration, indicating the widening, to the City Surveyor for review and approval prior to its deposit in the Land Registry Office. Such reference plan must be tied to the Horizontal Control Network in accordance with the municipal requirements and guidelines for referencing legal surveys. The Owner(s) must provide to the City Surveyor a copy of the Committee of Adjustment Decision and a draft Reference Plan that sets out the required widening. The Committee requires written confirmation from City Legal Services that the transfer of the widening to the City has been registered. All costs shall be borne by the Owner.
7. That the Owners provide a report, to the satisfaction of the City of Ottawa, demonstrating the adequacy of the aquifer with respect to quality and quantity to support the proposed development, failing which the Owners construct a new well on the severed lot and provide a report, to the satisfaction of the City of Ottawa, to demonstrate the adequacy of the aquifer with respect to quality and quantity to support the proposed development. The report must include a septic impact assessment to evaluate the water quality impact of the on-site septic system on the receiving aquifer.

The Owners’ report must demonstrate the following to the City of Ottawa:

- That the construction of any new well on the severed parcel is in accordance with the Ministry of the Environment, Conservation and Parks
- That the quality of the water meets the Ministry of the Environment, Conservation and Parks Regulations, Standards, Guidelines and Objectives;
- That the quantity of water meets all the Ministry of the Environment, Conservation and Parks requirements.
- That the septic impact assessment meets the Ministry of the Environment, Conservation and Parks requirements.

A qualified Professional Engineer or Professional Geoscientist must prepare the report. It is the Owner's responsibility to coordinate the person drilling a new well, if required, and the professional noted herein in order to properly satisfy this condition.

If the accepted report recommends specific mitigation measures or design requirements, the Owners shall enter into a Development Agreement with the City, at the expense of the Owners, which is to be registered on the title of the property, which includes those recommendations. In instances where the subject site has sensitive soils, the drilling of a well or the conveyance of a 30-centimetre reserve may be required. Both the report and any required Development Agreement shall be prepared to the satisfaction of **Development Review Manager of the Rural Branch within Planning, Real Estate and Economic Development Department, or his/her designate.**
