**CONSENT & MINOR VARIANCE APPLICATION
COMMENTS TO THE COMMITTEE OF ADJUSTMENT
PANEL 3**

PLANNING, DEVELOPMENT AND BUILDING SERVICES DEPARTMENT

Site Address: 1500 Thomas Argue Road, 15 Huisson Road
Legal Description: Part of Lots 13 and 14, Concession 3, Geographic Township of Huntley
File No.: D08-01-24/B-00205 and D08-02-24/A-00259
Report Date: November 13, 2024
Hearing Date: November 19, 2024
Planner: Luke Teeft
Official Plan Designation: Rural Transect; Rural Countryside; Carp Airport Special Policy Area
Zoning: T1B

DEPARTMENT COMMENTS

The Planning, Development and Building Services Department **has no concerns with** the applications.

DISCUSSION AND RATIONALE

Section 53 (12) of the *Planning Act*, R.S.O. 1990, c. P.13, as amended, permits the criteria for the subdivision of land listed in Section 51 (24) to be considered when determining whether provisional consent may be granted by a committee of adjustment. With respect to the criteria listed in Section 51 (24), staff have no concerns with the proposed consent.

Staff have reviewed the subject minor variance application against the “four tests” as outlined in Section 45 (1) of the *Planning Act*, R.S.O. 1990 c. P.13, as amended. Staff are satisfied that the requested minor variance meets the “four tests”.

CONDITIONS

If approved, the Planning, Development and Building Services Department requests that the Committee of Adjustment impose the following conditions on the applications:

1. That the Owner(s) provide evidence that payment has been made to the City of Ottawa for cash-in-lieu of the conveyance of land for park or other public recreational purposes, plus applicable appraisal costs. The value of land otherwise required to be conveyed shall be determined by the City of Ottawa in

accordance with the provisions of By-Law No. 2022-280, as amended. Information regarding the appraisal process can be obtained by contacting the Planner.

2. That the Owner(s) provide proof to the satisfaction of the **Manager of the Development Review All Wards Branch, or their designate**, to be confirmed in writing from the Department to the Committee, that each existing parcel has its own independent private sewage system, storm/foundation drainage, and well and that they do not cross the proposed severance line. If the systems cross the proposed severance line, are not independent, or do not meet the minimum spacing requirements of the Ontario Building Code and City of Ottawa Hydrogeological and Terrain Analysis Guidelines, the Owner(s) will be required to relocate the existing systems or construct new systems, at their own cost.
3. That the Owner(s) submit a Phase 1 Environmental Assessment prepared by a qualified person who meets the qualifications prescribed by the regulations, for approval by the **Manager of the Development Review All Wards Branch, or their designate**, to be confirmed in writing from the Department to the Committee, outlining the assessment of the property and determining the likelihood that one or more contaminants have affected any land or water, in or under the property.
4. That the Owner enter into an Agreement with the City, at the expense of the Owner(s) and to the satisfaction of the **Manager of the Development Review All Wards Branch, or their designate**, which provides the following covenants/notices that run with the land and bind future Owner(s) on subsequent transfers:

“The City of Ottawa does not guarantee the quality or quantity of the groundwater. If, at some future date, the quality or the quantity of the groundwater becomes deficient, the City of Ottawa bears no responsibility, financial or otherwise, to provide solutions to the deficiency, such solutions being the sole responsibility of the homeowner.”

“The property is located next to lands that have an existing source of environmental noise (airport) and may therefore be subject to noise and other activities associated with that use.”

The Committee requires a copy of the Agreement and written confirmation from City Legal Services that it has been registered on title.
5. That the Owners provide a report, to the satisfaction of the City of Ottawa, demonstrating the adequacy of the aquifer with respect to quality and quantity to support the proposed development, failing which the Owners construct a new well on the severed lot and provide a report, to the satisfaction of the City of Ottawa, to demonstrate the adequacy of the aquifer with respect to quality and quantity to support the proposed development. The report must include a septic impact

assessment to evaluate the water quality impact of the on-site septic system on the receiving aquifer.

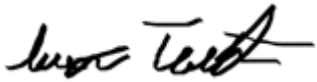

6. The Owners' report must demonstrate the following to the City of Ottawa:

- That the construction of any new well on the severed parcel is in accordance with the Ministry of the Environment, Conservation and Parks
- That the quality of the water meets the Ministry of the Environment, Conservation and Parks Regulations, Standards, Guidelines and Objectives;
- That the quantity of water meets all the Ministry of the Environment, Conservation and Parks requirements.
- That the septic impact assessment meets the Ministry of the Environment, Conservation and Parks requirements.

A qualified Professional Engineer or Professional Geoscientist must prepare the report. It is the Owner's responsibility to coordinate the person drilling a new well, if required, and the professional noted herein in order to properly satisfy this condition.

If the accepted report recommends specific mitigation measures or design requirements, the Owners shall enter into a Development Agreement with the City, at the expense of the Owners, which is to be registered on the title of the property, which includes those recommendations. In instances where the subject site has sensitive soils, the drilling of a well and/or the conveyance of a 30-centimetre reserve may be required. Both the report and any required Development Agreement shall be prepared to the satisfaction of the **Manager of the Development Review All Wards Branch, or their designate**.

The Report shall be prepared as per Procedure D-5-4 "Technical Guideline for Individual On-Site Sewage Systems: Water Quality Impact Risk Assessment" and Procedure D-5-5 "Technical Guideline for Private Wells: Water Supply Assessment".
