

## Tracking of Traffic Control Locations for AODA Compliance

**Date:** December 31, 2025

**Prepared by:** Road Safety Unit, Traffic Safety and Mobility Branch, Traffic Services, Public Works Department

### Important Considerations:

- The City of Ottawa continues to assess the operational and financial impacts of Bill 56 (Building a More Competitive Economy Act, 2025) on its road safety programs.
- Pedestrian Accessibility and Intersection Ramping (PAIR) Program funding is subject to Council approval on an annual basis.
- Planned year for remediation/construction may change if opportunities for project coordination arise, allowing for early construction.
- Upon further review over the course of 2025, six locations deemed already compliant with AODA regulations. These will be removed from the list moving forward.
- In 2025, one additional non-compliant location was discovered and added to the list.
- Construction was completed at 10 of the 14 anticipated locations in 2025. Construction of the remaining sites which include Beausoleil Dr. at Murray St., Rouncey Rd. at Tapadero Dr., Rouncey Rd. at Westphalian Dr., and Merivale Rd. at Viscount Dr. is now anticipated in 2026.
- By 2025 year end, there were 74 remaining locations requiring retrofits to achieve compliance.
