BACKGROUND

Each year, staff prepares separate capital budget adjustments and closure reports for the Transit Commission and for the Finance and Economic Development Committee (FEDCo). Each report contains recommendations on projects that fall within the respective mandates of the Commission or FEDCo.

When a capital project is approved by Council, a projected year of completion date is established for the project. Projects are to be closed the year following the projected year of completion and require Council approval in order to be closed.

Capital projects that are recommended to be closed are listed in Document 1. In closing these projects, surplus capital reserve funds are first applied to those projects being closed that are in deficit and the remaining net surplus is returned to source. Additional reserve funds may also be used to refinance projects to reduce previously approved debt authority.

Budget adjustments involving capital projects can be processed under the limits established by Council as contained in the Delegated Authority by-law. Those adjustments that exceed these limits require Council approval.

Generally, budget adjustments to capital projects are required to:

- Adjust for increases or decreases in project costs;
- Consolidate similar accounts to facilitate issuing of contracts;

- Create separate accounts to facilitate project tracking;
- Account for the receipt of revenues not previously anticipated or for the over/underestimation of revenues; and
- Adjust project financing.

The Delegation of Authority By-law 2016-369, as amended, specifies those parameters in which budget adjustments may be made if authorized by the City Treasurer. Those capital budget adjustment requests that do not meet the delegated authority limits of the City Treasurer require the approval of City Council. Generally, Council authority is required for those capital budget adjustments involving:

- Transfers between programs or internal orders in excess of 10% or \$100,000 whichever is the lesser;
- Transfers of debt authority between programs with previously approved debt authority, regardless of amount;
- Establishment of new projects outside the budget process;
- A reduction of or increase in funding authority; and
- Project closures.

This report includes those capital budget adjustments that require specific Council approval (Document 2) as well as those that have been made as a result of delegated authority provisions (Document 4). The latter is provided for the information of Committee and Council, while adjustments in the former document are being recommended for approval.

DISCUSSION

The recommended project closures and amendments will remove \$46.495 million in previously approved net spending budgets which will return \$5.083 million to tax supported capital reserve funds, \$21.442 million to the rate supported reserve funds, add \$4.135 million to the Development Charge accounts and reduce debt financing requirements by \$24.105 million.

The projects recommended for closure (Document 1) have been completed and are \$34.739 million under the net expenditure budget approved by Council. The budget adjustments that require Council approval (Document 2) propose a \$3.266 million decrease to the previously approved net expenditure budget authority.

The recommendations as proposed in this report to the Finance and Economic Committee and Council will eliminate \$24.105 million of previously approved debt financing requirements. Additional information on each recommendation is provided below.

RECOMMENDATION 1

Capital Projects Recommended For Closure

All capital projects recommended for closure are listed in Document 1. It also shows the net budget authority established for these projects, the actual spending incurred to deliver and complete the project and any resulting surplus or deficit.

Projects totalling \$482.917 million in net approved budget authority have been completed and are recommended for closure. Actual funding required is \$34.739 million less than budget which will result in \$7.145 million being returned to tax supported reserve funds, \$19.412 to rate supported reserve funds, along with a reduction of \$4.939 million in development charge funding along with a reduction of \$3.244 million of debt authority that is not needed to fund these projects.

RECOMMENDATION 2

Budget Adjustments Requiring Council Approval

Document 2 separates the budget adjustments requested by project managers (departmental requests) from those that are administrative adjustments.

Unlike those requested by departments, administrative adjustments do not have an impact on the scope or the nature of work, nor do they involve transfers between projects. Generally, they revise the financing of a project and require Council approval because they either involve debt financing or exceed the City Treasurer's delegated authority limits.

The overall impact of the departmental budget adjustments is a net reduction of \$3.266 million in the previously approved net budget authority for the projects listed in

Document 2.

RECOMMENDATION 3

Capital Projects Requiring Council Approval to Remain Open

As directed by the Executive Committee, capital projects will be considered for closure in 2017 if the stated completion date as established by the project manager is 2016.

Capital projects that qualify for closure, but are recommended to remain open based on the rationale provided by the project managers are listed in Document 3. Upon Council approval of this recommendation, the year of completion for these projects will be revised from a completion date of 2016 to its new completion date accordingly.

RECOMMENDATION 4

Capital Budget Adjustments Processed Under Delegated Authority

Those capital budget adjustments processed between June 1 and May 25 under the authority delegated to the City Treasurer (By-law 2016-369) are provided in Document 4 for the information of the Finance and Economic Development Committee and Council.
