NOVATECH ENGINEERING CONSULTANTS LTD

Ottawa

- we do not want to see trees cut down - west of Maxwell Bridge

10

- Need a ~~road~~ pathway connection behind current development

- 8,000 residents

* preserve the trees -

Adjacent to rural singles put Low Density

- Widen March Rd. to Dunrobin Rd.

* Keep hedgerow of mature trees behind Celtic Ridge.

- Please preserve the forest east of March road. It is unnecessary to ~~develop~~ destroy that forest.

Buffer of trees preserved behind Uttom Drive - Buffer of 30 metres.

Keep storm ponds away from existing rural singles

- Buffer behind Celtic Ridge. Keep hedgerow + behind it, link walking/bike path (from one end of Celtic Ridge to the top of Windance.

- We don't like Mattamy-type buildings / communities. + Minto!

- Introduce round ~~abouts~~ on Klondike & Maxwell Bridge.
- ~~Pedestria~~ Pedestrian overpasses east ⇔ west of March Road.
- buffering between rural subdivisions and new development.
- SWMP construction ~~⇔~~ & rural wells.

STORM WATER POND

16

① Park + Ride would be better situated at Dunrobin Rd + March Rd intersection as that is the location in which Country or Rural Traffic converges + cause the backups in traffic.

② With a growing population there is a need for a highschool in the area. West Carleton is too far.

③ Library as a two-story Building with space for community gathering and in particular, a senior's centre.

④ Pathway along stream beds

⑤ "Main Street" with Commercial on street level and residential on second level, ~~Light~~ as in Centrepoint

(6) Table 16 - our plan results in a "heavy" 1
sided on the East side of March Road.

(7) High density close to St. Isidore.

(8) Better pedestrian crossing on March Road → bridge across or underpass

(9) Storm pond in North east quadrant because it is already so low land it is a swamp. When we built we had to go up. When we dug down even 1 foot we hit the water table.
however as noted it cannot affect well water tables OR WATER QUALITY
