

Document 2: Automated Speed Enforcement New and Existing Locations

Table 1. NEW 2021/2022 LOCATIONS:

Listed in Table 1 below are the 15 new locations where automated speed enforcement (ASE) is proposed for 2021/2022 implementation. All sites have been reviewed and found to meet vendor technical and design specifications, available hydro, sufficient space for the device and required signage. There may be a possibility that unforeseen underground constraints may limit the installation at a site. This will be confirmed through the circulation process.
